## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Group I, claims 1-14 in the reply filed on 11 June 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 15-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11 June 2004.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "type" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "type"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

In claim 14 it is unclear if the "lower front leg support" is the same one recited in claim 1.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-2, 4-6, 13-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Bedard et al.

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Bedard et al. discloses a snowmobile comprising:

a frame 2; a motor supported by the frame; an endless drive track 15 supported by the frame and operatively connected to the motor; a seat supported by the frame; two steering skis supported by the frame; a side panel 22 connected to the frame, the side panel having a lower leg support 34 that is constructed and arranged to support a snowmobile rider's lower leg; the side panel is connected to the frame for relative pivotal movement about a side panel axis, and the side panel has open and closed positions relative to the frame, wherein a side of the motor is accessible when in its open position, wherein the side panel covers a side of the motor when in

Art Unit: 3611

its closed position, wherein the lower leg support is rigidly supported by the frame such that lower leg forces exerted on the side panel by the snowmobile rider are transferred to the frame through the side panel, wherein the side panel has a knee rest 28b that is constructed and arranged to support the snowmobile rider's knee, wherein the side panel has a lower front leg support that is constructed and arranged to support a lower front portion of the snowmobile rider's leg.

***Allowable Subject Matter***

7. Claims 7-12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references disclose snowmobile body structures.
